

GROUND PROTECTION / PORTABLE ROADWAYS / TEMPORARY FLOORING

What Is SignaRoad™?

- A medium-duty temporary composite plastic mat that is used to create roadways and work platforms
- Locks together to form a solid, non-shifting surface
- Use anywhere you would lay down plywood or timber mats
- Durable mats that last for years and protect any type of sub-surface
- Save time and money by preventing post-work ground remediation
- Improves safety by creating stable worksites
- Use over wet, muddy, grassy, and sensitive surfaces
- Easily get heavy equipment to worksites
- Ideal solution for creating temporary roadways in difficult to reach areas

Where to use SignaRoad™

- Construction Sites
- College/School Campuses
- Cemeteries
- Parks
- Golf Courses
- Front/Back Yards
- Transmission Projects
- Landscaping Projects
- Arborists/Tree Care Projects
- Outdoor Special Events (concerts, plays, festivals, staging needs)
- Structural Movers
- Water Driller/Pump Projects
- Septic Tank Projects
- Television and Movie Productions
- Lumber projects

Tread Pattern: Pedestrian/Vehicular (dual sided mat)

Weight Load Capacity: 400 psi (57,600 lbs/sqft)

Supports any type
of equipment

Ideal for outdoor
events

Frequently Asked Questions

Where do I use SignaRoad™?

Install over any unstable or sensitive surface including muddy, wet, sandy, or grassy conditions.

How much weight will SignaRoad™ hold?

400 psi (57,600 lbs/sqft). For its size and weight, SignaRoad™ is the most versatile mat on the market.

Do I need equipment to install SignaRoad™?

Yes, each SignaRoad™ piece weighs 496 pounds and is typically installed using a forklift. SignaRoad™ securely connects together using durable cam-locks.

Why is SignaRoad™ better than wood mats?

SignaRoad™ lasts longer, distributes weight better, will not splinter/crack, will not absorb water or contaminants, is much stronger, and can be reused for years.

How long will SignaRoad™ last?

SignaRoad™ is extremely durable with a 15+ year life span. Can be cleaned and easily transported for multiple uses.

Can I use SignaRoad™ on either side?

Yes, SignaRoad™ can be used on either side. One side incorporates a vehicular tread pattern while the other incorporates a pedestrian tread pattern.

Features & Benefits

- Portable and durable
- Overlapping flanges distribute weight over large surface areas
- Will not rot or splinter
- Can be used in any environment
- Able to withstand extreme weights
- Protects vehicles & equipment from excessive wear and damage
- Surface traction provides added safety for personnel
- Saves time and labor costs
- Eliminates environmental cross-contamination
- Will not warp, expand, or contract
